

PREVENTIVE MAINTENANCE, REPAIR & PARTS PROGRAM

COMPLETE COVERAGE FOR YOUR EQUIPMENT with a single investment

Full Service Parts and Repair Program. The Washer Solutions™ Gold Service Program is a full service parts and repair plan designed to meet the specific needs of your facility and ensure your equipment continues to operate at factory specifications. The program is structured to include equipment inspections with preventive maintenance service, parts required to maintain equipment operation, emergency service with a guaranteed response time at your facility within 24 hours, replacement part installation, and unlimited callbacks during normal business hours at no additional cost. During each inspection your equipment is evaluated and tested to ensure it meets performance specifications. Operation of your equipment is continually monitored throughout the contract period to resolve any issues that arise and to identify potential areas of weakness that may result in future failures. The goal of the Gold Service Program is to maximize equipment uptime with a single investment.

Online Service Documentation. Washer Solutions provides 24/7 access to all your detailed service history and maintenance records required for compliance with regulatory agencies, including JACHO, FDA and AAALAC. In our web-based online service center, you will have the ability to submit electronic service requests quickly and easily, view upcoming scheduled visits, and retrieve detailed service history reports for each piece of equipment at your facility. All of this information is available to you when it is convenient with 24/7 web access. The Washer Solutions Online Service Center was created to improve the service request process and provide secure electronic storage of required service documentation for our customers.

GOLD SERVICE PROGRAM

Our most comprehensive onsite service plan, the Gold Service Program provides complete coverage for your equipment with a single investment. The program ensures that your equipment will continue to operate at peak performance and costly downtime is minimized. If you are looking for a fixed price plan to effectively maintain your equipment and control your budget, the Gold Service Program is the right choice for you.

GOLD SERVICE PROGRAM INCLUDES:

- Performance & Diagnostic Equipment Assessment
- Safety Inspections
- Preferred Labor Rate for Billable Service
- Ninety (90) Day Warranty on Parts & Associated Labor
- Toll-Free Telephone Support
- Detailed, Online Service Documentation
- Onsite Scheduled Preventive Maintenance Labor
- Travel Charges for Scheduled & Unscheduled Visits
- Scheduled Preventive Maintenance Parts
- Unscheduled Service Labor (Onsite within 24 hours)
- Unscheduled Repair Parts

The Right Service Partner is Key. By choosing the right service partner, you can feel confident that your equipment will operate at peak performance, 24/7, and maximize uptime of your critical equipment. The wrong service partner may leave your equipment inoperable for days, or even weeks, leaving you to incur the high costs of downtime at your facility. Washer Solutions™ is the right choice, but don't take our word for it. Contact us today for references and speak with one of our many satisfied customers.

Service is where we excel, and we will be onsite within 24 hours of your emergency service request, typically at your facility the same day. Washer Solutions' certified technicians are factory trained and have years of experience servicing an impressive range of OEM equipment, including AMSCO, BASIL, GETINGE/CASTLE, LANCER, MTP, STERIS, TUTTNAUER and more. Our experts service washing, sterilization and surgical equipment in many of the leading hospitals and universities across the U.S.
